

# Airport charge rates summary

Summarised below are charge rates for airports that have engaged Avdata Australia to collect charges, as at 15 June, 2018. Charges apply to airport usages and are expressed as \$/tonne (ie \$/1000kg) unless otherwise noted. The normal charge is determined by multiplying the certified maximum take-off weight of an aircraft by the charge rate on a pro-rata basis, and in many cases a minimum charge equivalent to that for one tonne applies.

This list is intended as a brief summary only. Charge rates at some airports are more complex than described here and may include charges that are not listed specifically. Charges for training activity, parking, night usage etc may apply even if not specified. Only charges billed through Avdata are included; additional charges billed through other agencies may also apply.

While we endeavour to keep this document current, Avdata accepts no responsibility for the accuracy, completeness or currency of this information. Parties who rely upon this list do so at their own risk; actual rates should be checked with the owner of each facility.

**These rates are expressed exclusive of GST; 10% GST applies in addition to the rates shown.**
